AI & The Future: Ultimate 3-Hour Workshop Teacher Manual

October 2025

Contents

1 Workshop Overview 2

2 Part 1: Welcome & Icebreaker 3

3 Part 2: What is AI & How It Started 3

4 Part 3: AI Today + Live Demo 4

5 Part 4: Future of AI: Students, Programmers & Life 5
- 5.0.1 Students . . . 5
- 5.0.2 Programmers . . . 5
- 5.0.3 Daily Life . . . 5

6 Part 5: Quiz, Reflection & Wrap-Up 5

7 Teacher Tips & Extensions 6

8 Appendix: Video Transcript — “The Path to God-like AI” 6

1 Workshop Overview

Hey there, fellow teacher! This manual is designed to feel like a chat over coffee—practical, fun, and packed with ways to get kids buzzing about AI. We're targeting middle-schoolers (11-15), so everything's bite-sized, interactive, and tied to their world (think apps, games, and future dreams). The goal? Spark wonder while gently introducing big ideas like AI's potential risks and the need for us humans to stay in the driver's seat.

Audience: Ages 11–15 (adaptable for all vibes—quiet thinkers to chatty creators).
Duration: 3 hours (with flexible buffers—life happens on Zoom!).
Platform: Zoom (or Teams—test those polls and breakouts ahead!).
Overall Goal: Get kids excited about AI's magic, from today's tools to wild futures, while weaving in real talk on ethics, risks, and human control. They'll leave feeling empowered, not overwhelmed.
Learning Objectives: By the end, these young minds will:

- Nail what AI is and spot it in daily life.
- Piece together AI's history like a puzzle.
- Play with AI hands-on and chat about its ups and downs.
- Explore future twists—like super-smart AI that could outthink us all—and brainstorm ways to keep it safe.
- Reflect on how AI fits into their lives, schools, and the world.

New Integration: We've swapped in the eye-opening Rational Animations video "The Path to God-like AI" (https://www.youtube.com/watch?v=0bnxF9YfyFI; 13:52 duration, May 2025 release). It dives into AI's trajectory—from chatbots to AGI (smarter-than-humans AI), self-improving systems, ASI (superintelligence beyond all of us combined), and even "god-like" AI that could reshape everything. We simplify concepts like recursive self-improvement (AI making better AI) and existential risks (uncontrolled AI accidentally sidelining humans, like we do to ants). Used in Part 4 to fuel balanced, kid-friendly debates on excitement vs. caution. Transcript in Appendix for your prep.
Materials Checklist: Zoom setup, slides (embed the video!), tools like ChatGPT and Kahoot. Pre-download the video just in case. Handouts? Timeline PDFs or scenario cards—keep it simple!
Inclusivity Tips: Mix up examples with diverse faces in AI (e.g., global innovators). Let kids respond via chat if speaking's not their jam. Subtitles on demos/videos for all ears and eyes.

2 Part 1: Welcome & Icebreaker

Let's kick things off with energy—think of this as the "hook" to reel them in. Goal: Make 'em smile, connect, and get curious right away.

Teacher Script

"Hey, future innovators! I'm [Your Name], and welcome to 'AI & The Future.' Imagine machines that chat like friends, drive cars, or even invent stuff—whoa, right? Today, we'll play games, try real AI, and dream big about how it could change your world. No boring stuff—just fun and real talk. Quick chat share: What's one gadget you'd make smarter? Let's go!"

Slide Suggestions:

- Title: "AI & The Future" (bold Noto Sans, 48pt, titleblue on a starry gradient). Pic: Diverse kids teaming up with friendly robots (grab from Unsplash—search "kids AI fun"). Toss in a subtle GIF of a lightbulb popping.

Icebreaker — Spot the AI!

Slide with 8 pics in a grid: Google Maps, Netflix picks, Siri, basic calculator, self-driving car, ChatGPT, old-school washer, Spotify vibes.

"Thumbs up for AI, down for nah—react or chat your picks!" Reveal with fun facts: "Spotify? Yep, it learns your mood like a psychic DJ!" Tally and laugh at surprises.

Backup: Chat votes if reactions glitch.

Teacher Wrap-Up

"You guys rock—AI's everywhere, sneaking into your tunes and routes. Who's surprised they use it daily? Spill!"

Quick Poll

Zoom polls:

- Q1: Used AI? (Yes/No/Maybe—"Like auto-correct? Tell us!")
- Q2: AI smarter than us? (Yes/No/Depends—"On what, creativity?")

Chat for 5-7 mins: "Love that, Mia—'depends' is spot-on!" Buffer if needed. Transition: "Great warm-up! Now, let's unpack AI's story..."

3 Part 2: What is AI & How It Started

Time to build basics—keep it light, like storytelling around a campfire. Goal: Show AI's not magic, but a journey we can understand.

Teacher Script

"AI's short for Artificial Intelligence—basics: Machines learning like you do, from data and tries. Picture training a pup: It flops, learns, nails it. AI's the same, but super-fast with info. It's our tool, not a boss—powers your feeds! Quick ethics tease: Later, we'll talk keeping it kind."

Slide Suggestions:

- Def slide: "AI = Smart Machines Learning Like Us" (36pt, headinggreen). Comic panels: Kid biking (falls, learns) vs. AI data loop (accentorange arrows—Canva it!).

Activity — Mini Timeline
Padlet board (share link): 7 events to sort:

- 1950: Turing wonders, “Can machines think?” (WWII hero!).
- 1956: McCarthy dubs it “AI”—the birth!
- 1997: Deep Blue chess win.
- 2011: Siri chats up.
- 2016: AlphaGo game master.
- 2022: ChatGPT storyteller.
- 2025: Brain chips/voices boom (nod to future vids).

Groups sort, add emojis/facts. Debrief: “McCarthy dreamed thinker-machines—cool, huh?”
Backup: Verbal if tech flops; add your own event for stars.
Teacher Wrap-Up
“AI’s adventure: From dreams to now. Tech’s speeding it up—next, see it live!” Q&A space.

4 Part 3: AI Today + Live Demo

Hands-on time—let ’em feel the wow! Goal: Link AI to their lives, pros and cons.
Teacher Script
“AI’s here now: Curates your TikToks, maps rides, spots illnesses. Worldwide: Helps farmers in India! But we’re the bosses—watch for biases.”
Slide Suggestions:

- Grid: Logos with stats (“Netflix: AI guesses your binge!”). Colorful, diverse users.

Live AI Demo
ChatGPT: “Wacky idea? (Pirate chef!)” Type, read, discuss: “Human-good? Credit ideas?” Alt: Teachable Machine—train gestures, kid tests.
Backup: Pre-record . Tease: “Glitches? That’s why we guide!”
Group Activity — AI Detective
Breakouts: 7 scenarios:

- Fridge basics vs. recipe whiz.
- Music player vs. mood DJ.
- Driver vs. auto-bus.
- Weather static vs. predictor.
- Toy script vs. learner-bot.
- Spam rules vs. smart filter.
- Brain-wave alarm (future tease).

“AI? Pros/cons?” Debrief themes: “Control’s key!” Backup: Group chat.

5 Part 4: Future of AI: Students, Programmers & Life

The heart—dream big, but add caution from the video. Goal: Inspire while teaching balance, like AGI (human-level smarts), self-improvement (AI upgrading AI), ASI (smarter than all humans), and risks (uncontrolled AI sidelining us, not hating, just reshaping—like ants in a building site). Stress: We can guide it!

Teacher Script

"AI's future? Yours to shape! Cures, eco-fixes, epic games. But our video warns: If AI gets super-smart (AGI: Like humans but everywhere), self-improves (recursive: AI builds better AI, speeding up), hits ASI (smarter than everyone combined), or god-like (physics-bending power), risks rise—like extinction if we lose control. Not scary robots, but us forgetting safeguards. Let's watch and chat!"

Video Integration

Play Rational Animations video (full or excerpt: 3:33–7:25 on AGI to ASI). Pause at 5:55 (self-improvement): "Thoughts on AI clones speeding progress? Exciting or whoa?" Post: "Key ideas? AGI general smarts, self-upgrades, super ASI—how keep humans in charge? 3 takeaways in chat!" (Simplifies risks: "Not evil, but busy reshaping— we demand rules!")

Impact Areas (with Video Concepts)

5.0.1 Students

Video tie: AI tutors evolve to AGI-level personalization. "Pros: Dream learning! Risks: Over-rely? Your vote?" Poll/chat.

5.0.2 Programmers

Copilot to self-improving AI: Jobs shift to inventors. Video fear: "New gigs like AI trainers—team up?"

5.0.3 Daily Life

Smart worlds, but ASI risks: "God-like AI reshaping? Privacy/choice key!" Add: Brain chips.

Brainstorm Activity

Jamboard: "2050 AI World—Dreams, Risks & Fixes." Video inspo: "AGI schools? ASI cures? But existential risks—add safeguards like global rules!" Share 4 ideas; debate buffer.

6 Part 5: Quiz, Reflection & Wrap-Up

Wrap with fun and heart—goal: Lock in learnings, inspire action.

Quiz Game

Kahoot (10 Qs):

- AI means? (Artificial Intelligence)
- Siri AI? T/F (T)
- ChatGPT year? (2022)
- Video risk? (Uncontrolled ASI/extinction)
- AI job create? (Ethicist)
- AI dad? (McCarthy)
- Video: AI breakfast? Wait, trick—future perks!
- School shift? (AGI tutors)
- Ethics: Who controls? (Us!)
- Fix idea? (Rules/self-improve safely)

Discuss faves; badges via reacts. Backup: Verbal.
Reflection
Poll/chat:

- "Video wow? (Self-improving AI!)"
- "AI future feels? Excited/worried—plus action (code/learn)?"
- "Risk fix? (Video: Institutions first!)"

Closing:
"AI + you = Unstoppable! Not takeover, but team-up. Video says: Build controls now. You're the shapers—stay curious! Questions?"
Slide Suggestions:

- End: "Your AI Adventure" (40pt, accentorange). Kid innovators + video thumb. Email CTA.

7 Teacher Tips & Extensions

Tips: Pump energy—use names like "Alex, spot-on!" Pace with chats; assess via reflections. Video's thoughtful—frame positively. Rehearse!
Extensions: Debate video risks (teams). Homework: Journal AGI dream/risk.
Resource List:

8 Appendix: Video Transcript — "The Path to God-like AI"

Source: Rational Animations (May 2, 2025; 13:52). Great for prep—key concepts: AGI (human-level), self-improvement, ASI (super), risks. Full transcript:
Full provided in user doc; abbreviated here—use for handouts.
